Texas Commission on Environmental Quality

COMBINED

**NOTICE OF RECEIPT OF APPLICATION AND
INTENT TO OBTAIN WATER QUALITY PERMIT (NORI)**

AND

**NOTICE OF APPLICATION AND PRELIMINARY DECISION
FOR TPDES PERMIT FOR MUNICIPAL WASTEWATER**

AMENDMENT

PERMIT NO. WQ0014624001

APPLICATION AND PRELIMINARY DECISION. Terra Verde Utility Company, LLC, 8827 West Sam Houston Parkway North, Suite 200, Houston, Texas 77040, has applied to the Texas Commission on Environmental Quality (TCEQ) for a major amendment to Texas Pollutant Discharge Elimination System (TPDES) Permit No. WQ0014624001 to authorize an increase in the discharge of treated domestic wastewater from a daily average flow not to exceed 20,000 gallons per day to a daily average flow not to exceed 100,000 gallons per day, to authorize less stringent effluent limitations for five-day carbonaceous biochemical oxygen demand and ammonia nitrogen, and to change the discharge route in the existing permit. TCEQ received this application on February 16, 2018.

This combined notice is being issued to update the discharge route, which has changed since the issuance of the original NORI.

The facility will be located at 22602 Hegar Road, in Waller County, Texas 77447. The treated effluent will be discharged **directly to Spring Creek** in Segment No. 1008 of the San Jacinto River Basin. The designated uses for Segment No. 1008 are high aquatic life use, public water supply, and primary contact recreation. In accordance with 30 Texas Administrative Code Section 307.5 and the TCEQ's *Procedures to Implement the Texas Surface Water Quality Standards* (June 2010), an antidegradation review of the receiving waters was performed. A Tier 1 antidegradation review has preliminarily determined that existing water quality uses will not be impaired by this permit action. Numerical and narrative criteria to protect existing uses will be maintained. A Tier 2 review has preliminarily determined that no significant degradation of water quality is expected in Spring Creek, which has been identified as having high aquatic life use. Existing uses will be maintained and protected. The preliminary determination can be reexamined and may be modified if new information is received. This link to an electronic map of the site or facility's general location is provided as a public courtesy and is not part of the application or notice. For the exact location, refer to the application.
